DIAMOND HILL

INVESTED IN THE LONG RUN

## Team

**Aaron Monroe, CFA**  
Portfolio Manager

**Kristen Sheffield, CFA, CIPM**  
Portfolio Specialist

## Tickers

**Investor: DHSCX**  
**Class I: DHSIX**  
**Class Y: DHSYX**

## Philosophy and Process Highlights

Under our intrinsic value philosophy, we:

- Treat every investment as a partial ownership interest in that company
- Seek to always invest with a margin of safety
- Possess a long-term investment temperament
- Recognize that market price and intrinsic value tend to converge over a reasonable period of time

## Portfolio Guidelines

- Typically 50-80 positions
- Maximum position size is 7%
- Top 10 holdings are typically greater than 25% of net assets
- Maximum industry exposure is 20%
- Maximum sector exposure is 30%

## Market Capitalization

The portfolio typically invests in companies with a market capitalization below \$3 billion (or, if greater, the maximum market capitalization of companies generally within the capitalization range of the Russell 2000 Index) at the time of purchase.

## Top Ten Equity Holdings<sup>1</sup>

	Sector	% of Net Assets
Red Rock Resorts, Inc. (CI A)	Cons. Discretionary	5.2

Carefully consider the Fund's investment objectives, risks and expenses. This and other important information are contained in the Fund's prospectus and summary prospectus, which are available at [diamond-hill.com](http://diamond-hill.com) or calling 888.226.5595. Read carefully before investing. The Diamond Hill Funds are distributed by Foreside Financial Services, LLC (Member FINRA). Diamond Hill Capital Management, Inc., a registered investment adviser, serves as Investment Adviser to the Diamond Hill Funds and is paid a fee for its services. Not FDIC insured | No bank guarantee | May lose value

Margin of safety is a principle of investing in which an investor only purchases securities when their market price is significantly below their intrinsic value. In other words, when the market price of a security is significantly below your estimation of its intrinsic value, the difference is the margin of safety.

<sup>1</sup>Securities referenced may not be representative of all portfolio holdings. The reader should not assume that an investment in the securities was or will be profitable.

<sup>2</sup>Cash & Other may include cash, treasuries, money market funds and short duration fixed income funds.

<sup>3</sup>To obtain contribution calculation methodology and a complete list of every holding's contribution to return during the period, contact 855.255.8955 or [info@diamond-hill.com](mailto:info@diamond-hill.com).

The performance quoted represents past performance. Past performance is not indicative of future results. Investment returns and principal values will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. The Fund's current performance may be lower or higher than the performance quoted. For current to most recent month-end performance, visit [diamond-hill.com](http://diamond-hill.com). Performance assumes reinvestment of all distributions. Returns for periods less than one year are not annualized. Class I shares and Class Y shares include Investor share performance achieved prior to the creation of Class I shares and Class Y shares.

**Risk disclosure:** Small- and mid-capitalization issues tend to be more volatile and less liquid than large-capitalization issues. Fund holdings, sector allocations and portfolio statistics subject to change without notice.

The Russell 2000 Index measures the performance of roughly 2,000 US small-cap companies. The Russell 2000 Value Index measures the performance of US small-cap companies with lower price/book ratios and forecasted growth values. The indexes are unmanaged, market capitalization weighted, include net reinvested dividends, do not reflect fees or expenses (which would lower the return) and are not available for direct investment. Index data source: London Stock Exchange Group PLC. See [diamond-hill.com/disclosures](http://diamond-hill.com/disclosures) for a full copy of the disclaimer.

<sup>4</sup>Active Share measures the difference between portfolio holdings and the benchmark. The higher the active share, the greater the risk. Relative to the Russell 2000 Index. Standard Deviation measures the volatility of a portfolio's returns. Beta measures a portfolio's sensitivity to market movements. Sharpe Ratio is the measure of risk-adjusted return of an investment portfolio. Alpha is the excess return of an investment relative to the index's return. R-squared represents the percentage of a portfolio's movements that can be explained by general market movements. Up/Down Capture Ratio is used to evaluate how well a portfolio performed relative to an index during periods when that index has risen/dropped. Statistics for periods less than one year are not annualized.
